

I'm Not Sure If My Plan Is Compliant

03/05/2025 1:17 am AEST

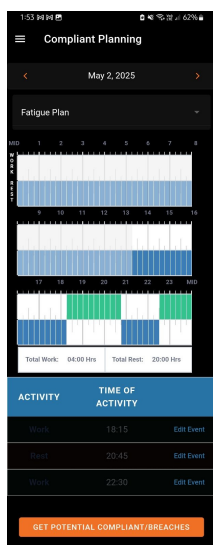

Plan Ahead with Confidence: Logmaster's New Logbook Planner for Drivers

At Logmaster, we're committed to helping drivers take control of their time, avoid breaches, and make the most of every legal working hour. That's why we've launched a powerful new feature in the Logmaster app — the Logbook Planner.

Whether you're preparing for a week of scheduled work or picking up ad hoc jobs, the Logbook Planner gives you the clarity you need to stay compliant with fatigue laws.

What Is the Logbook Planner?

The Logbook Planner is a new section in the Logmaster driver app that allows you to map out your planned work and rest times before the day begins.

You simply:- Select a date

- Drag and drop your work/rest periods into the visual planner
- Tap “Get Potential Compliant/Breaches”

The app will instantly tell you if the plan is compliant or in breach of fatigue management rules — so there's no guesswork.

Why Drivers Love It

1. Plan Without Risk

Before you even get behind the wheel, you'll know whether your schedule will pass a compliance check. If something's off, you can adjust it and recheck until you get a green light.

2. 2. Fit in Extra Jobs with Confidence

Got an unexpected booking? Use the planner to see if you can legally take it on without breaching. You'll avoid compliance stress while maximising your time on the road.

3. 3. Avoid the Penalties

Fatigue breaches can lead to fines, downtime, or worse. The planner helps you avoid errors that might otherwise happen when you're rushing or unsure.

Real Planning for Real Life

We know transport work doesn't always follow a set routine. Things change — jobs get delayed, breaks happen in odd places, and no two days are the same.

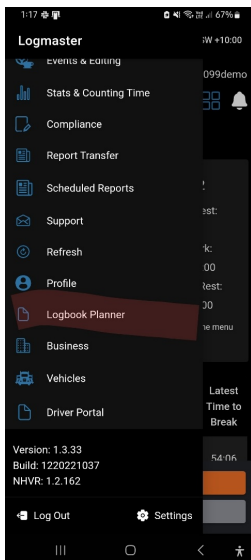

That's why we built Logbook Planner to work for:

- Rigid schedules and rotating rosters
- Ad hoc or last-minute shifts
- Multi-day fatigue planning strategies

With the Logbook Planner, you're in control.

Available Now

The Logbook Planner is included in the latest version of the Logmaster app.

If you don't see it yet, update your app via the Play Store or App Store.

Once updated:

- Open the side menu
- Tap Logbook Planner
- Start planning your next day on the road

Your Work, Your Plan, Your Rules (Within the Law)

Logmaster is more than a digital logbook — it's your partner in compliance. The Logbook Planner is another tool to help drivers like you make smart decisions, avoid penalties, and stay on top of fatigue rules.

Start using it today — because a good plan is the first step toward a better journey.
